

Products to Consider for Preventing Falls

Door guards to remind people not to walk through doorways where they could fall down stairs, and door alarms to alert a caregiver if it happens anyway.

Posey Door Alarm: Price: \$79.44

Description: This alarm is an effective component of a facility or home fall and wander prevention program. Alarm sounds one of five tones when the 53" door banner is detached from the monitor. The easy to install banner adjusts to fit most facility and residential doorways. When the banner is not in use, the monitor can be easily converted for individual clip and magnet operation.

Posey Sitter Select Alarm Unit: Price: \$117

Description: Sitter Select Unit is a versatile, cost-effective fall monitor that allows a choice between sensor or clip and magnet operation. Simple to program and use, the Sitter Select can be used for bed, chair or toilet. Five alarm tones and four alarm modes differentiate between patients and other facility alarms. A "HOLD" function allows the patient to be removed from the alarm without adjusting alarm settings. The voice recording option allows a family member or caregiver to record a personalized message. The nurse call interface allows dual staff notification.

Posey Velcro Alarm Belt Sensor: Price: \$49.50

Description: The Posey Velcro Alarm Belt Sensor can be used on most wheelchairs and geri-chairs through the use of adjustable securing loops. The alarm signals to caregivers that an unassisted chair exit is about to take place. The belt can be easily transferred between chairs and is compatible with the Posey KeepSafe, Sitter II and Sitter Select units.

Posey Sitter II Alarm Unit: Price: \$198

Description: Patient fall monitors are now available with an optional wireless nurse call system. Posey Sitter II offers caregivers even more flexibility and has no invasive unit. Designed for use with any of Posey's bed chair sensor options, the Sitter II allows caregivers to select the appropriate sensor for each application. Ten alarm tones and a recordable voice option help calm the patient and differentiate between other facility alarms. An adjustable delay accommodates restless sleepers and helps reduce false alarms. The "Hold" feature allows the patient to be removed from the sensor for up to six hours without re-programming. Indicator lights are visible from all angles and allow at-a-glance verification of alarm status, day or night.
