

Steps to Protect and Improve Health

Adhering to this list can result in significant benefits. Use it to start a conversation about preventive health actions at your next doctor's visit.

Some simple preventive health measures, in rank order, are listed below.

- * A daily aspirin to prevent heart attacks and stroke (in men over 40 and women over 50).
 - * Screening and brief counseling by doctors on use of tobacco products.
 - * Routine colorectal-cancer screening (for adults 50 and older by any recognized method).
 - Hypertension screening via routine blood-pressure tests and medication (if necessary).
 - Annual flu shots (for adults 50 and older).
 - * Immunization of adults 65 and older against bacteria that cause pneumonia and related diseases.
 - * Screening and brief counseling of problem drinkers by their physicians.
 - * Vision screening (for adults 65 and older).
 - Cervical cancer screening (for sexually active women and women over 21).
 - Cholesterol screening (for men 35 and older and women 45 and older).
 - Routine breast-cancer screening (for women 50 and older and discussion with women ages 40 to 49 to set an age to begin screening).
 - Calcium-supplement counseling (for adolescent girls and women).
 - Obesity screening (for adults) and high-intensity diet and exercise counseling (for the obese).
 - Depression screening (for adults).
 - Hearing-impairment screening (for adults 65 and over).
- * Those preventive measures that are ignored by more than half who would benefit from them are indicated by asterisks.
